PERSONAL PROJECTS

Chat Analyser (04/2023 - 08/2024)

- Analyze user's queries and understand user's message • Provide effective answer for college related queries • Save user's time and effort • Personalize user interaction and enhance user experience

Email Sender (09/2023 - 10/2023)

- Developed a fully functional email sender application using React, demonstrating a strong command of JavaScript, front-end web development, and the React framework.
- Successfully integrated email sending functionality using relevant APIs or libraries, such as Nodemailer

Ai Discord Bot (02/2023 - 07/2023)

- Developed a robust AI Discord bot using Nix for package management and JavaScript for programming, showcasing expertise in both build system management and bot development.
- Successfully integrated Nix, a powerful package manager and build system, into the project to manage dependencies, ensuring reproducible builds and a clean development environment.
